Summary

Experienced in designing and developing software for business solutions.

A software developer with experience in multiple settings, can design and develop programs using the latest and most appropriate technology.

Also a web developer specializing in both frontend and backend development. Experienced with all stages of the development cycle for dynamic web projects. Well-versed in numerous programming languages including: JAVA, Kotlin, PHP, JavaScript, Bash and VB.NET. Strong background in project management and customer relations. Successful at marketing techniques. Knowledgeable about digital media platforms and deadline-oriented editing. Through these qualities, I have confidence in my ability to facilitate positive change and collaborative effort.
